

Title: Email Signature Setup Guide

Use case: Employee cannot set or sync Outlook signature.

Common issues: signature missing, not synced, or new mail has no signature.

Step 1: Open Outlook and go to File > Options > Mail > Signatures.

Step 2: Check the correct mailbox is selected before editing the signature.

Step 3: Set default signatures for new messages and replies separately.

Step 4: Save changes and restart Outlook if the signature still does not appear.

Step 5: Re-add the account or recreate the Outlook profile if sync still fails.

Escalation: create a ticket if multiple users have the same signature issue.
